

Backsaver Crane – Mark II with Extendable Boom (500kg)

The simple design of the Backsaver Crane means it is easy to assemble and can be fitted almost anywhere – to jetties, utes or tray tops and to a wide variety of fixed platforms. When a Backsaver Crane is vehicle mounted and the time comes to change vehicles, it is simple to remove and leaves only four holes. The Backsaver Crane is then ready to install elsewhere. The Backsaver Crane's simple operation means that little can go wrong and service support is available through Jarrett Spare Parts distributors around Australia.

The Backsaver Crane provides the perfect lifting solution to tradesmen, farmers, delivery drivers and anyone who has to lift loads of anything from fuel drums, jet skis, small boats, motor bikes, car engines, ride-on-mowers, cement mixers, farm machinery, livestock, fence, brick cutters and even tractor tyres – the possibilities are endless. In fact if you have ever thought, "There's got to be a better way", chances are that Jarrett has already found it.

Max extended height = 1950(vertical) 1450(horizontal) at 350kg S
 Min extended height = 1530(v) 1700 (h) at 280kg S.W.L
